JOB OPENING

ONE Research Officer/Engineer position in the area of medical technology (medtech) at the National University of Singapore (NUS)

Job Description:

This is a medtech project that aims to develop an intraoral sensor for bruxism. Candidate will focus on sensor development and evaluation at Prof Lim Chwee Teck's laboratory in the Department of Biomedical Engineering at NUS, and develop a functional prototype. Candidate may also have the opportunity to be exposed to the clinical setting and perform customer discovery amongst the dentists and patients at the National Dental Centre Singapore. Those with prior research experience in mechanical design, electronics and prototyping will be preferred.

Requirements:

- BEng (Hons) in electrical, mechanical or biomedical engineering
- Highly motivated with ability to work independently
- Organized and responsible team member
- Good writing and verbal communication skills

Application:

Please send your application including a cover letter, detailed resume and names of three references to:

Dr Liu Yuchun, National Dental Centre Singapore

Email: liu.yuchun@ndcs.com.sg

Only shortlisted candidates will be notified.
